

Kevin Luch

Full-Stack Software Developer

Chicago, IL
847.807.9609

kevinluch@gmail.com

[LinkedIn Profile](#) - Fluent in English and Spanish

[GitHub Profile](#)

SUMMARY:

I am a **Full-Stack developer** with knowledge of **C#, JavaScript, and Python**. Having recently completed an apprenticeship in the **Fertility Industry** as a **Software Developer**. My time was spent creating feature updates, front-end blog posts, business improvement projects, and documenting processes. I took part in the project creation and kickoff of the company's first app development for a large Fertility Clinic. I am looking to continue my full-stack growth with an emphasis on app & client side development. I am looking to join a team that values continual learning and hard work.

TECHNICAL SKILLS:

Programming Languages: C#, JavaScript ES5 and ES6, HTML5, CSS3, Python

Frameworks: ASP.NET, MS Entity Core, Flask, Django, Node.js, Bootstrap, MongoDB, MySQL, Azure

Technologies: Twilio, jQuery, Ajax and APIs, React, UnitTest/TDD, OpenCV, Bcrypt, Dapper, Postman

PROJECTS:

[Personal Portfolio](#)

https://github.com/KevinLuch/portfolio_practice

Responsive Website built in HTML, CSS, and JavaScript. Full functioning form to Google Sheets

Solo project

[Gig Hub](#)

<https://github.com/KevinLuch/GigHub>

Application to track gigs for an artist. Built in ASP.NET and styled in Bootstrap. The application has usability best practices and the form to add a gig has full validations with a MySQL database.

Solo project

[Employee Tracking Application](#)

https://github.com/KevinLuch/git_employee_tracking

Employee Tracking application built in ASP.NET MVC with Razor view engine and backed with Entity Framework. Styled in Bootstrap with MySQL database.

Solo project
